

Dr. Ali Delpisheh

Personal information:

DOB: 1967

Nationality: **Iranian**

Current Position: **Associate Professor in Clinical Epidemiology**

Epidemiology Department

Faculty of Medicine

Ilam University of Medical Sciences (IUMS)

PO Box: **69315-138**, Ilam, Iran I.R.

Tel/Fax: **+98-841-2227103** (Office)

Email: alidelpisheh@yahoo.com

Educational Background/Qualifications

- **BSc**, "Operating Room (Surgery)" Iran University of Medical Sciences, Tehran- Iran (1987-1991)
- **MSc**, "Community Health" Iran University of Medical Sciences, Tehran-Iran (1991-1995),
Dissertation: *Nutritional Status of Primary School Children in Ilam-Iran*
- **MS**, "Master of Tropical Paediatrics" Liverpool School of Tropical Medicine, UK (2002-2003),
Dissertation: *Trends in Prevalence of Asthma and Respiratory Disorders in Merseyside/England*
- **PhD**, "Clinical Epidemiology" Liverpool School of Tropical Medicine, UK (2003-2005) Thesis:
Maternal Metabolic Gene Polymorphisms and Intrauterine Growth Restriction
- **PostDoc (Postdoctoral Research Fellowship)**, Reproductive Health Group, Liverpool University, England-UK (2005-2007)

Selected Courses & Workshops Attended

- Management and Control of Sever Malnutrition in Children; **WHO**, Geneva/Switzerland, 2002
- Research Methodology: **The University of Liverpool**, England, 2003
- PCR (RFLP) Genotyping & Sequencing: **The University of Liverpool**, England 2004
- Data Analysis (SPSS): Mersey Deanery, **Edge Hill University**, England, 2005
- Critical Reviews and Publication Issues, **British Medical Journal**, U.C. L., England, 2006
- Digital Library, **Iranian Ministry of Health & Medical Education**, Tehran- Iran, 2007
- Critical & Creative Thinking, **Ilam University of Medical Sciences**, Ilam, Iran, 2009
- Crises Management in Disasters, **Basij Jame'e Pezeshki**, Tehran, Iran, 2011

Job Experiences

- Director, Shahid Salimi & Imam Khomeini General Hospitals (Ilam, 1990-1991)
- Faculty Member, Ilam University of Medical Sciences (since 1995)
- Head Education Department (IUMS, 1995-2000)
- Deputy of Medicine Faculty (IUMS, 2001)
- Research Fellow (LSTM, UK, 2005-2007)
- Head Epidemiology and Health Statistics Department (IUMS, 2008)
- Head Medical Department (International University of Chabahar, 2007)
- Chief Consultant (Imam Reza International University, 2010)
- Dean Faculty of Health (Ilam University of Medical Sciences, since 2008)

Teaching Experiences

History of teaching the following topics for Medical, Paramedical, Health, Nursing, Midwifery and MBA students since 1995: *Epidemiology (Invited lecturer by the Shahid Beheshti University of Medical Science-Tehran for PhD courses), Individual Health, Community Health, Maternal, Child and Reproductive Health, Geriatrics Health, Medical Concepts, Special English, Strategic Management, Research Methodology and Statistics, Ethics in Medical Sciences*

Research Interests

Nutrition and Nutritional Status, Maternal and Child Health, Public health, metabolic gene polymorphisms, Cancer researches, Communicable & Non-Communicable diseases

Selected Awards & Achievements

- The **Top Lecturer** through a national selection by the Iranian Ministry of Health and Medical Education (Tehran, Iran, 1997), and in 2012 by Ilam University of Medical Sciences
- The **Excellent Poster Presenter**; through a British scientific competition for medical PhD students, Northwest of England (Liverpool, UK, 2005)
- The **Top University Researcher**, Ilam University of Medical Sciences (2007, 2008, 2009 and 2010, 2011 and 2012)
- The **Author of the Hottest Articles** (The top 25 most read and highly-cited ISI papers) by *Science- Direct*, Feeding the World Wide Web and SAGE Journal Publishing Groups

<http://www.feedage.com/feeds/2454625/most-cited-full-text-articles>

<http://top25.sciencedirect.com>

<http://chc.sagepub.com/reports/mfc1.dtl>

<http://www.feedage.com/feeds/2221408/most-read-full-text-articles>

- The First-Ranked of Scopus Complex "**h-index (7)**" for the ISI papers affiliated to the Ilam University of Medical Sciences between 2006-2012.

Memberships

- The National Board of Epidemiology (Iran, I.R. since 2009)
- The Royal College of Paediatric and Child Health (UK, 2006)
- The Iranian Society of Epidemiology (ICE since 2010)
- The Scientific Committee of the 6th Iranian Congress of Epidemiology (Iran, I.R. Shahrood 2010)
- The IUMS Research Council (since 2007)
- The IUMS Education Council (since 2007)
- The IUMS Research Centre for Prevention of Psychosocial Injuries (Since 2008)
- The IUMS Strategic Planning Council (Since 2009)
- The IUC Strategic Planning Council (Since 2010)
- The Strategic Studies Council of the Supreme Leader Representativeness Office (Since 2011)

Selected Theses Contributions

1. Dr. Al-Saqladi A." *Clinical profiles and severity of sickle cell disease in Yemeni children*, Liverpool School of Tropical Medicine/UK (**PhD Project**, completed, 2010)
2. Dr. Koshy G. "*Doctor-diagnosed asthma, pregnancy smoking and risk of obesity in later childhood*", Emma Kinderziekenhuis, Academic Medical Centre, University of Amsterdam, Netherlands (**PhD Project** Completed, 2012)
3. Dr. Senga E.L. "*Maternal gene polymorphisms and placental malaria in Malawi, Africa*", Emma Kinderziekenhuis, Academic Medical Centre, University of Amsterdam, Netherlands (**PhD Project** completed, 2012)
4. Dr. Alfadhalah K. "*Risk factors associated with nosocomial Methicillin-resistant staphylococcus aureus (MRSA) infection in Kuwaiti adults and children*", Liverpool School of Tropical Medicine/UK (**Master of Tropical Paediatrics dissertation**, completed, 2006)
5. Dr. Elemraid M. "*A case- control study of nutritional factors associated with chronic supportive otitis media*, Liverpool School of Tropical Medicine/UK (**Master of Tropical Paediatrics dissertation**, completed, 2006)
6. Mr Maleki MH" *Genotyping of Hepatitis C shushes in patients referred to Ilam Blood Transfusion Directory* " Zanzan Azad University (**MSc of Microbiology**, completed, 2009)
7. Drs Borji Z. & Safaee H" *Serum levels measurement of IgG and IgM against helicobacter Pillory amongst pregnant mothers with nausea and vomiting during pregnancy*" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2009)
8. Drs Shidel L& Salari H" *A case control study of serum levels measurement of IgG and IgM against Toxoplasmosis amongst pregnant mothers with history of abortion*" Ilam University of Medical sciences, Faculty of Medicine (MD dissertation, completed 2009)

9. Dr. Emami Moghadam A. "Drug resistance and molecular analysis of Acinetobacter Baumannii isolated from the hospitalised patients in Tehran" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed 2009).
10. Dr. Taherifard P. "Postpartum depression and associated risk factors in women referred to health centres in Ilam in 2008" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed 2009)
11. Dr. Shirani R. " Antimicrobial effect of Pistacia Alantica on aureous staphylococcus and E. Coli (in vitro)" Ilam University of Medical sciences, Faculty of Medicine (MD dissertation, completed, 2009)
12. Dr. Mohmedi M " Antimicrobial effect of Pistacia Alantica on Pseudomonas Aeruginosa (in vitro)" Ilam University of Medical sciences, Faculty of Medicine (MD dissertation, completed 2009)
13. Dr. Aminiloo Z " Prevalence of traumas, accidents and amputations due to post-war mints amongst borderline residents in Ilam province between 2002-2008" Ilam University of Medical sciences, Faculty of Medicine (MD dissertation, completed 2009)
14. Dr. Emami T. "Prevalence of pre-cancer symptoms and its associated factors in Ilam city" Ilam University of Medical sciences, Faculty of Medicine (MD dissertation, completed 2010)
15. Ms Javaheri M "Preparedness investigation of Influenza A in Ilam Community" (MSc of Epidemiology, Tehran University of Medical Sciences, 2010 in progress).
16. Mr Kaki R "Mucin 1 gene polymorphism of buffalo population in Khouzestan province using PCR-RFLP"(MSc of Veterinary Genetic, Ramin Agriculture University, 2010 in progress).
17. Mr. Jozi Arkavazi H." Factors associated with patients' rights in view of patients and clinical nurses in Ilam hospitals"(MSc of Nursing, Shahid Beheshti University of Medical Sciences, 2011 completed).
18. Dr. Abdollahi S. "Comparison between Gradient Albumin and Light tests applications for diagnosis purposes". Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed 2010).
19. Dr. Veisi S. "Effects and aspects of blood cupping (Hejaamat) in patients referred to the related clinics" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed 2010).
20. Dr. Soliemani S. "Frequency of Influenza symptoms and associated factors in Ilam City during the pandemic stage" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed 2010).
21. Dr. Shokrian M. "Sperm analysis in infertile men referred to the Qaaem Hospital" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2011).
22. Dr. Soleimannejad M. "Prevalence of disorders of Thyroid function tests in patients with heart failure" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2011).

23. Dr. Yaqoubi M. "Levels of extremely sensitive activated protein C in patients with acute coronary syndrome" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2011).
24. Naji A. "Prevalence of antibody against Hepatitis C&B in patients with Likien Plan" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2011).
25. Mrs Baqeri N. "The association between Helicobacter pylori infection and pre-eclampsia in Ilami pregnant women" "(**MSc of Midwifery**, Shahid Beheshti University of Medical Sciences, 2011 in progress).
26. Dr. Mirzahosseini Kashani H. "Mean age and prevalence of menopause in women referred to Imam and Mostafa Hospitals in Ilam city between 2007-2009" Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, Completed, 2011).
27. Dr. Motaqi M., Prevalence of affecting factors on repeated abortion in Ilam Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2012).
28. Dr. Mabrookzadeh H., Eradication of helicobacter pylori by two diets in Ilam Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2012).
29. Dr. Solimani S., Comparison of treatment effects of Zanjabil and Avishan on coughing in patients with Influenza symptom. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
30. Dr. Shafiee M., Familial marriage and congenital defects in Ilam. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2012).
31. Dr. Teymoorzadeh A., Analyse of levels of IGG, INF in serum and urine samples of active smokers and their families against crude cigarette AG Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2012).
32. Dr. Shokriani M., Semen analysis in infertile men. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
33. Bazvandi S., Epidemiological assessment of tendency toward plastic surgery in Ilam. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
34. Yeganeh N., Didlipidemia and diabetis assessment in women with polycystic ovaries syndrome. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, in progress, 2012).
35. Noorbakhsh F. ACG changes in patients with acute coronary syndrome and increased level of Hsrp levels in CCU patients. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
36. Tami S., Relationship between increased levels Hscrp and arrhythmia in ACS patients. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
37. Zamani M., Association of lipid "a" with confirmed coronary disease in Ilam. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).

38. Taherian S., Frequency of refereeing emergency patients and its associated factors. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
39. Soltani F., Assessment of FNA in comparison with histological biopsies as a standard in breast malignancies. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
40. Poormirza F., Diagnosed fatty liver by sonography causalities in Ilam. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
41. Qamishi A. Assessment of BIA in patients with different thyroid function reffered to day clinics in Ilam. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
42. Rahimi S. Salivary cyanide in smokers and non-smokers and its association with immunological factors. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
43. Torkchin Z., Serum levels of cerebral leptid nateryoretic in cardiac patients. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
44. Baradaran N., Detoxification using Clonidine and norponephrine and adults aged 18-30 years. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
45. Asadi M., Fatty liver patients; demographic characteristics. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).
46. Naserian S., Osteoporosis incidence in celiac patients. Ilam University of Medical sciences, Faculty of Medicine (**MD dissertation**, completed, 2012).

Completed Studies Using Research Grants (Selected)

1. **Delpisheh A.** An anthropometrical assessment of primary school children (IUMS/1995)
2. **Delpisheh A.** Nutritional status of pre-school children in Ilam, Iran (IUMS/1996)
3. **Delpisheh A.** and Sayemiri, K. Prevalence of hypertension in association with body mass index amongst farmers and workers aged +40 in Ilam, Iran (IUMS/1998)
4. **Delpisheh A.** and Hashemian P. A need assessment of continuing education and life learning for medical doctors in Ilam, Iran (IUMS/1999)
5. Nursing lecturers and **Delpisheh A.** An investigation of knowledge and practice of mothers with sever diarrhoea children in Ilam, Iran (IUMS/2000)
6. **Delpisheh A.** and Brabin B.J. Changes in salivary cotinine levels in asthmatic children in Merseyside, England (LSTM/2004)
7. **Delpisheh A.** Maternal metabolic gene polymorphisms, pregnancy smoking and intrauterine fetal growth restriction (PhD project, UK/ 2005)
8. **Delpisheh A.** and Brabin B.J. Interaction of asthma and obesity in later childhood in Merseyside, England (Post doctoral project, UK/2007)

BBC Brasil: 10 de abril, 2007 - 19h05 GMT (16h05 Brasília) **Fumantes têm mais chance de ter meninas, diz estudo**

http://www.bbc.co.uk/portuguese/reporterbbc/story/2007/04/070410_fumante_gravidez_mv.shtml

Fumantes têm mais chance de ter meninas, diz estudo

Pais que fumam têm mais chances de ter bebês do sexo feminino, de acordo com estudo realizado pela Liverpool School of Tropical Medicine, na Inglaterra.

pesquisa, envolvendo quase 9 mil bebês nascidos entre 1998 e 2003, revelou que mulheres que fumam bastante têm mais chances de ter meninas e a probabilidade aumenta se o pai também for fumante.

Este grupo tem 50% menos chances de ter um bebê menino do que o grupo integrado por pais que não fumam.

O estudo também encontrou um possível vínculo entre o fumo passivo e uma maior probabilidade de nascimentos do sexo feminino se o pai for fumante.

"Nós já sabemos, a partir de estudos anteriores, que fumar durante a gravidez afeta o peso do bebê e a duração da gravidez", **diz Ali Delpisheh**, coordenador da pesquisa.

"Também sabemos que filhos de mães que fumam durante a gravidez sofrem mais risco de desenvolver doenças respiratórias como a asma", acrescenta.

Embriões

Segundo **Delpisheh**, os registros de nascimentos em países desenvolvidos nos últimos 50 anos mostram um declínio significativo na proporção de nascimentos de bebês meninos em relação aos de meninas.

O cientista afirma que a relação entre o número de nascimentos de meninos e o de meninas é um indicador importante da saúde de uma população porque embriões masculinos são mais frágeis do que os femininos.

"O que nós descobrimos quando levamos outros conhecidos fatores de risco em consideração, como a idade da mãe, o número de filhos e a situação sócio-econômica, é que o fumo durante a gravidez está associado a mais nascimentos de meninas", **diz Delpisheh**.

"Essa associação aumenta entre os que fumam muito e se o pai também fuma."

O pesquisador afirma que os números também variam de acordo com a intensidade do hábito.

Os cientistas não sabem ao certo o que causa esse efeito, mas a hipótese é de que as células do espermatozóide que carregam o cromossomo y, associado ao nascimento de meninos, são mais sensíveis a mudanças desfavoráveis associadas ao fumo.

"Estes resultados são importantes quando se avalia os danos para a saúde pública provocados pelo fumo na gravidez. Mas precisamos fazer mais pesquisas para descobrir exatamente o que causa esse efeito", concluiu **Delpisheh**.

Smoking while pregnant raises the likelihood of having a girl

The chance of giving birth to a boy drops by almost half if both parents are smokers, study shows

By **Marie Woolf**, Political Editor

Sunday, 8 April 2007

Parents who are smokers when they conceive a child are far more likely to have girls than boys, an extensive study by paediatricians has found. The chance of having a male baby drops by almost half if both parents smoke during early pregnancy, amid fresh evidence that smoking could "kill" male foetuses in the womb.

Smoking not only reduces the chances of conceiving a male child, but could stop male embryos implanting in the womb and cause miscarriages.

While almost 52 per cent of all new-born babies are male in the western world, the proportion of female offspring rises dramatically among smokers. The study into 9,000 pregnancies in Liverpool found a startling imbalance in the number of girl babies among parents who smoke. Mothers who smoked during pregnancy were one-third less likely to have male children than mothers who did not smoke. If the father also smoked, and if factors such as the health and age of the mother were accounted for, the chances of having a male child reduces by almost half.

The research by paediatricians at the **Liverpool School of Tropical Medicine** has caused excitement in the international scientific community, which says it raises serious questions about the effect of smoking on population balance.

"There are a lot of studies looking at birth weight in relation to smoking but this shows that mothers who smoke are more likely to have a female child," said Alison Poulton, senior lecturer in paediatrics at the University of Sydney, Australia.

The study looked at 9,000 women who delivered children at Liverpool Women's Hospital between 1998 and 2003. It found heavy smokers were the most likely to deliver female babies, but that passive smoking may also affect the gender of a child. Mothers who do not smoke but are exposed to cigarettes from partners are less likely to have boys.

The research, by a team of paediatricians led by Professor Bernard Brabin, found that substances contained in cigarettes, such as nicotine, inhibit sperm carrying male chromosomes from fertilising eggs.

"The study aimed to assess whether maternal smoking during pregnancy affects the likelihood of the offspring being male or female. When we adjusted for factors statistically like maternal age and if both parents smoked they had almost double the chance of having a female baby," said Mr Brabin, professor of tropical paediatrics. "We don't know what causes it. The hypothesis is that sperm cells carrying the Y-chromosome which are responsible for male children are more sensitive to unfavourable smoking related changes in the mother. Smoking reduces oestrogen and causes changes to the mother's cervix. The message is clear: if you want an increased chance of a male baby, don't smoke during pregnancy."

Girl babies for smokers

Monday, April 09 2007 @ 07:57 AM Central Daylight Time

The Independent claims: Smoking while pregnant raises the likelihood of having a girl. Meanwhile, the chance of giving birth to a boy drops by almost half if both parents are smokers.

Smoking while pregnant raises the likelihood of having a girl

The chance of giving birth to a boy drops by almost half if both parents are smokers, study shows. Parents who are smokers when they conceive a child are far more likely to have girls than boys, an extensive study by paediatricians has found. The chance of having a male baby drops by almost half if both parents smoke during early pregnancy, amid fresh evidence that smoking could "kill" male fetuses in the womb. Smoking not only reduces the chances of conceiving a male child, but could stop male embryos implanting in the womb and cause miscarriages.

Study links smoking in pregnancy to gender imbalance

The research, by a team of paediatricians led by Professor Bernard Brabin and **Dr Ali Delpisheh** of the child and reproductive health group at the Liverpool School of Tropical Medicine, concluded that "maternal smoking exposure during pregnancy either preferentially increases early male fetal deaths or reduces the frequency of conceiving male children". The researchers believe that substances contained in cigarettes, such as nicotine, inhibit sperm carrying a male chromosome from fertilizing eggs and implanting.
